Strategic Partner:

How European and Mediterranean LNG demand is set to undergo a renaissance beyond 2017, with a review of the market outlook and of emerging markets.

Why FSRUs and other offshore or 'near shore' technologies are providing cost-effective solutions to those seeking to import LNG and natural gas into their domestic markets.

How governments and nonprofit organizations can secure sustainable industry growth and influence market situation, in synergy with recent regulations.

Terminal designs, Ports and case studies examined that deliver large-project technology results but in a more scalable manner.

How LNG as a global commodity is providing liquidity to both suppliers and customers seeking cheap, flexible cargoes on shorter-term contracts.

Effective development of LNG bunkering & infrastructure that will support the growth of LNG as a marine fuel and why shipping emissions compliance can no longer be ignored.

LNG construction, modularization and off-site prefabrication from EPC Contractor's perspective.
